**A fan is highly
recommended!**

Diabetes Supplies

Lancets, syringes, glucose tabs, glucagon, and alcohol swabs will be provided by CP for use by staff.

Please note that all staff should bring their own insulin (labeled with their name) to be stored in club med.

Please note that you need to bring **all** other supplies needed for diabetes management including pump supplies, CGM sensors, meters, and test strips. Keep in mind that you may need to perform site changes more often than usual because of sweating and swimming.

A Few More Notes...

Staff are allowed to bring their own archery equipment – the following rules apply:

- Any archery equipment must be in the proper case/storage and must be labeled with the owner's name.
- Equipment must be checked in with archery staff upon arrival.
- Archery equipment is not permitted in any cabins. Equipment will be stored by archery staff when not in use at the range.

Staff members are welcome to bring their own fishing equipment. Please make sure that their name is labeled on all equipment brought to camp.

When packing shoes, please ensure that they are closed-toe. It's also a good idea to pack a pair of shoes that you don't mind getting a little muddy. You never know what the summer weather has in store!

While personal electronic devices are permitted for staff, it is important to keep in mind that campers are not allowed to have them. In that way, try to be cognizant of your use of these devices in front of campers. Outside of use for diabetes management, you should try to restrict your use of these devices to only when not in the presence of campers.

If you'd like to bring supplies to decorate your cabin, go right ahead! But please keep in mind that it's not required! You will also have some access to the supplies in our Art Barn.
